Accufy Update Instructions

Important Before applying the update v 2.4 make sure you are using v 2.3 (You can check the current version to login your admin panel > left sidebar), If you are using an older version please contact our support to get the previous versions.
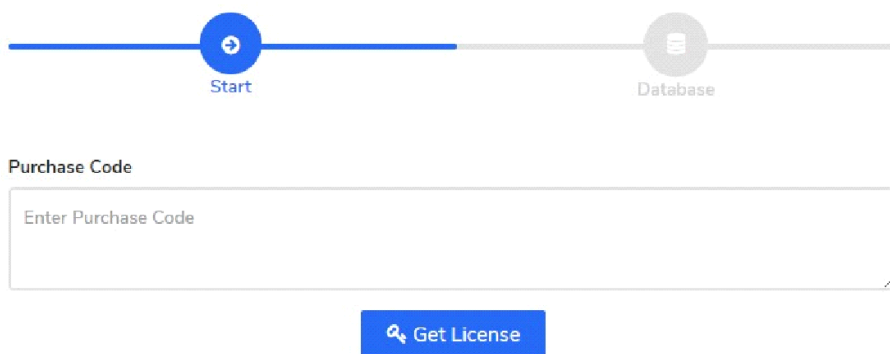

Step 1: Download the latest accufy script and extract it on your pc. Open <u>updates > update_v2.3_v2.4 > uploads</u> folder there you will see 2 zip files in this folder and you need to upload those files in your server please follow the directions below.

- **application.zip** > upload path: Goto your **project root folder > application > upload** this zip file and extract it inside this folder.

- **assets.zip** > upload path: Goto your **project root folder > assets > upload** this zip file and extract it inside this folder.

Step 2: Upload "updates" folder in your project root folder

Step 3 Open a browser and write a url like this: **www.yourdomain.com/updates/update_v2.3_v2.4** you will see a page like below here enter your item purchase code for update this script.

Step 4: Here provide your current database credentials and wait a few seconds to update your scripts.

If you are using a multilingual feature then this step is for you.

Step 5: After successfully updating login as Admin go to language from left sidebar and translate new language values type (user).
